

Annotation

JSC Kazakhtelecom The Directorate of the Academy of Infocommunication Technologies for employees of all branches that are part of the company, as well as for individual companies, provides and carries out duties to upgrade qualifications in the specialties. All branches of the company are centralized. Throughout the company, all employees must send managers reports on their work. To date, with the development of technology, to facilitate this process, there is a need to create an Application. When developing a diploma in order to simplify the process, a website was created. The Web application was created by the type of corporate portal sites. Authorization to the site occurs through a previously created database.
