Abstract

Theme of the graduation project is "Development of the *Planner* mobile application for planning the day".

The aim of the graduation project is to develop a mobile application that allows us to plan our daily routine, thereby distributing the time as efficiently as possible.

The graduation project includes an Introduction, 7 chapters and a Conclusion.

The Introduction reveals the topicality of the chosen topic. The first chapter sets the aim and the tasks to be performed. The second chapter analyzes and selects technologies for solving the issue. The third chapter describes the selected development tools. The fourth chapter is a description of the application development, a step-by-step description of the practical solution of the task. The fifth chapter describes the user manual. The sixth chapter contains the justification for the economic feasibility of the developed project. The seventh chapter examines measures to improve working conditions in the framework of the project.
