

## **Annotation**

Theme of the graduation project: "Developing a mobile training application".

The purpose of this final qualifying work is to develop a training mobile application for traffic rules, during which the ways of creating this application were considered. In the practical part, screenshots of application development are presented, with a description of each stage.

The thesis project includes an introduction, 5 chapters and a final conclusion.

The introduction reveals the relevance of the chosen topic, sets the development goal and the tasks that need to be performed, determines the scope of the development.

The first chapter analyzes and selects technologies for solving the problem.

The second chapter describes the design of the application.

The third chapter is a description of the development of a mobile application, contains a step-by-step description of the practical solution of the task.

The fourth chapter is the rationale for the economic feasibility of the developed project.

The fifth chapter deals with measures to improve working conditions in the framework of the ongoing project.

The conclusion highlights research and development results:

In the framework of the graduation project, materials on the development of mobile applications for the Android operating system, the main stages of the development of mobile applications were studied.
