Annotation

This diploma project created a web application for children aged 8 to 15 years. In this application, users can gain knowledge in an interactive format, communicate with each other, make new friends, and with the help of games to strengthen the studied material.

The application administrator can add new material, news to the platform and interact with the user via chat.

In the course of the project have been used the tables in the database Postgresql, Visual Studio Code and the programming language JavaScript.
