

## **ANNOTATION**

The purpose of this diploma project is to create a module for storing and processing digital data for a florist company that sells wholesale and retail flowers.

The relevance of the topic of this diploma project is related to the need to store and process various types of digital data in the conditions of a florist company that manages the activities of employees.

In addition, the last two chapters address issues of life safety, provide a feasibility study, and calculate the cost of development, cost of implementation, and payback period of the project.
