Annotation

Currently, many innovative technologies have achieved significant development. One of the developed areas of innovative technologies is finding the optimal solution to work using mobile applications. In the future, this direction can change the whole world, make it more convenient, interactive and safe. Many companies are implementing mobile applications in everyday life, that is, this technology is used in all areas of activity. Many of them are aimed at introducing this technology in the field of education - from preschool to higher education institutions.

This thesis deals with the development of a mobile application for the restaurant industry in order to facilitate the workforce. It is highly likely that the application will gain wide relevance, having found application in the restaurant industry. The purpose of the thesis is to create a "Menu" for a mobile application on the Android platform for the restaurant "Aspandiyar Express".
