

Annotation

This diploma project analyzes the measures of personal data protection in the GDPR regulations. During the analysis, the site image was compiled in accordance with the regulations.

During the preparation of the project, the GDPR regulations were fully studied, and important points were included in the work. The website is written in HTML and CSS. As a result, it is proposed to introduce a number of requirements of the GDPR regulation into the legislation of Kazakhstan.

In the section life Safety, the calculation of the need for primary fire extinguishing means and the calculation of grounding is carried out, and the working conditions of programmers are also analyzed. In the section of project risk assessment, the project risks were considered, which were calculated based on two factors and analyzed using the Coras program.
