Annotation

This diploma project is dedicated to the topic "online ordering of women's clothing". The online store offers various categories of products. This graduation project uses MVC technology. The Integrated Development Environment (IDE) PyCharm and the SQLite database management system are used in this project. During development, the Django framework of the Python programming language was used. This allows us to create statistical and dynamic content. We also used models that correspond to the logic of our web application. The site consists of two parts-server and client.
